[Portfolio](#) [Github](#) [Linkedin](#) abhinnk21@gmail.com +91-6388541550

## Skills

JavaScript, TypeScript, React, Next, Tailwind CSS, Bootstrap, Python, Git, Github, Socket.io, Firebase, Docker, Python, Vercel, Netlify

## Work Experience

### Frontend Developer - Doorpix (Aug, 2023 - Present)

- Used **ReactJS** / **NextJS** and **Tailwind CSS** to create admin dashboards.
- Enhanced websites with new pages and features incorporating best **UI/UX** practices
- Implemented **responsive designs** for optimal functionality and **performance** across diverse devices and screen sizes.
- Wrote and Maintained **Documentation** with **Docusaurus**.
- Made **Landing Pages** for New Age startups which helped them in converting visitors into customers.
- Addressing challenges by fostering close collaboration with team members and designers and resolving issues through effective communication with clients.

### Frontend Developer Intern - Maddie Games (Aug - Oct, 2021)

- Developed a web-based **multiplayer board game** enabling multiple players to join and participate in teams.
- Translated high-fidelity **Figma** designs into responsive front-end using **ReactJS** and **Bootstrap**.
- Established **API** endpoints and used **Web Sockets** for seamless communication between the frontend and backend.
- Made the server using **ExpressJS** and wrote some of the of the **game logic**.

## Projects

### Battle of Brains [[Live](#)] [[Github](#)]

- A Web based **Multiplayer Game** made using React and Bootstrap.
- It uses **web sockets** to enable communication, **local storage** and **cookies** to store game state.
- **JSON** and **Express** Server to handle data.

### The Dukandar Store [[Live](#)] [[Github](#)]

- **E commerce** website, Created using **ReactJS**, **Bootstrap**, **Firebase** **Google Authentication** and **JSON**.
- Used **React Router** for routing, made a **search bar**, a **cart system**, **login** and used **Firebase** as the database.
